

IN THE SPECIFICATION:

Applicant notes that, due to a scanning error, the heading at the bottom of page 6 of the specification appears in the Image File Wrapper as “Exmplary Implementation and Operation.”

This heading should properly read:

--Exemplary Implementation and Operation--

Consequently, Applicant respectfully requests that the specification be amended, if necessary, to correct this scanning error and render this heading as indicated above and as the heading appeared in the hardcopy of the specification originally filed.
